Overview

Axygen® universal pipet tips are designed to fit a wide variety of single- and multi-channel pipettors. Flexible walls and a series of internal sealing rings ensure a secure fit with less force required to load and eject.

The Axygen product offering now also includes the Axygen MultiRack System, which is our updated reload and racking system. In addition to the universal fit tips packaged in the MultiRack System, we now also offer LTS Compatible tips in the MultiRack System, and if you are worried about your carbon footprint, the Axygen HybridRack™ is a perfect option for you.

- ▶ **Automated assembly** – Ensures product is free from contamination.
- ▶ **ISO 13485 and ISO 14001** – Certified quality management systems supply stringent quality processes to ensure the highest quality finished good.
- ▶ **In-house testing** – In-house QA lab allows product to be validated for fit, form, and function prior to release.
- ▶ **Brand you can trust** – A long track record of innovation and value as one of the Corning trusted brands.
- ▶ **Broad product offering** – Corning offers many different styles of pipet tips, including racked, filtered, reloads, stack racks, low retention, wide bore, and more. With so many options, you are sure to find a tip that works for you.

Axygen® MultiRack Tip System

Engineered to fit most pipettors on the market, the Axxygen MultiRack Tip System is a complete pipet tip system offering in various packaging styles to meet every lab's needs. The MultiRack Tip System offers standard and extended-length sizes in volumes from 0.1 µL to 1250 µL. Racked and reload packaging styles feature preloaded tips in easy-load, color-coded deck inserts. With a small benchtop footprint and reusable rack, this system minimizes environmental impact and maximizes lab space. Axxygen MultiRack Tip System products are made in the USA and meet ISO standards.

Axygen® LTS Compatible Tips

Axygen LTS Compatible Tips are ergonomically designed to reduce discomfort and optimized to work with Rainin LiteTouch pipettors, all with the quality you have come to expect from Corning. By reducing the force required to seal and eject, Axxygen LTS Compatible tips can help you avoid using excess force to obtain an effective seal between the pipettor and pipet tip. Axxygen LTS Compatible tips are available in your favorite packaging formats including Axxygen HybridRack™, a sustainable packaging choice. All LTS tips are composed of USP Class VI polypropylene and manufactured in an ISO 13485 and ISO 14001 United States based facility.

Axygen® HybridRack™ Pipet Tips

Born from a desire to reduce the amount of waste happening in laboratories, Axxygen HybridRack pipet tips are an example of our innovative spirit leading to a more sustainable future. By replacing the traditional plastic rack and lid normally found in racked pipet tip products with a paperboard rack and lid, we can reduce the amount of plastic per case by 70%, or approximately two pounds per case of 200 μ L tips. The HybridRack is strong enough to support multi-channel pipetting, and as soon as the rack is empty, it can be recycled using any curbside recycling program.

Axygen® Traditional Pipet Tips

Known around the world for industry leading quality, accuracy, and precision, Axxygen Traditional pipet tips have been the preferred liquid handling solution for laboratories around the world for the last 20+ years. Axxygen Traditional pipet tips are designed to fit a wide variety of single- and multi-channel pipettors. Flexible walls and a series of internal sealing rings ensure a secure fit with less force required to load and eject. Featuring tips with extended length, wide bore designs for viscous solutions, and our trademarked Maxymum Recovery surface, Axxygen Traditional pipet tips are sure to meet and exceed your liquid handling expectations.

Warranty/Disclaimer: Unless otherwise specified, all products are for research use or general laboratory use only.* Not intended for use in diagnostic or therapeutic procedures. Not for use in humans. These products are not intended to mitigate the presence of microorganisms on surfaces or in the environment, where such organisms can be deleterious to humans or the environment. Corning Life Sciences makes no claims regarding the performance of these products for clinical or diagnostic applications. *For a listing of US medical devices, regulatory classifications or specific information on claims, visit www.corning.com/resources.

Corning's products are not specifically designed and tested for diagnostic testing. Many Corning products, though not specific for diagnostic testing, can be used in the workflow and preparation of the test at the customers discretion. Customers may use these products to support their claims. We cannot make any claims or statements that our products are approved for diagnostic testing either directly or indirectly. The customer is responsible for any testing, validation, and/or regulatory submissions that may be required to support the safety and efficacy of their intended application.
