Anti-Breast epithelial mucin [Mc5] Standard Size Ab00345-10.7

This antibody is in our proprietary AbFab2™ recombinant F(ab2) format - based on Human IgG1 sequence with a short dimerization domain to improve stability and a his tag.

This chimeric human antibody was made using the variable domain sequences of the original mouse IgG2a format for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human F(ab)2, AbFab2™ His-Tagged, Kappa

Clone Number: Mc5

Alternative Name(s) of Target: BEM

UniProt Accession Number of Target Protein:

Published Application(s): ELISA

Published Species Reactivity: Human

Immunogen: Human breast epithelial mucin.

Specificity: Specifically binds BEM.

Application Notes: This antibody binds to human BEM, a gel-forming extracellular protein that is frequently overexpressed in human breast cancer.

Antibody First Published in: Christian et al. 1996 Cloning and expression of cDNAs encoding the variable domains of the anti-breast carcinoma antibody Mc5. Hybridoma 1996; 15(2):155-158 [PMID:8743296](#)

Note on publication: Describes how Mc5 has been used as a reagent in the diagnosis of breast cancer.

Product Form

Size: 200 µg Purified antibody.

Purification: Purified by Immobilized Metal Affinity Chromatography

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
