Anti-Membrane type 1 metalloprotease [LEM-2/15] Standard Size Ab00364-10.3

This antibody was created using our proprietary Fc Silent™ engineered Fc domain containing key point mutations that abrogate binding to Fc gamma receptors.

This chimeric human antibody was made using the variable domain sequences of the original mouse IgG1 format for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human IgG1, Fc Silent™, Kappa

Clone Number: LEM-2/15

Alternative Name(s) of Target: MT1-MMP

UniProt Accession Number of Target Protein:

Published Application(s): Blocking, ELISA

Published Species Reactivity: Human

Immunogen: The cyclic peptide possessing the sequence of residues 218-233 of the V-B-loop of MT1-MMP.

Specificity: This antibody binds to residues 218-233 of the V-B loop of MT1-MMP with a Kd of 2.32E10-9M.

Application Notes: This antibody binds to residues 218-233 of the V-B loop of MT1-MMP which is a mediator of cell migration and is frequently involved in malignancy of tumours by promoting metastasis. The antibody acts as a non-competitive inhibitor of the receptor.

Antibody First Published in: Udi et al. 2015 Inhibition mechanisms of membrane metalloprotease by an exosite swiveling conformational antibody. Structure 2015; 23: 104-115 [PMID:25482542](#)

Note on publication: Describes the crystal structures of the LEM-2/15 bound to MT1-MMP.

Product Form

Size: 200 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic

procedures for humans or animals.
