Anti-CXCL9 [I5-8] Standard Size Ab00379-1.4

This antibody was created using our proprietary Fc Silent™ engineered Fc domain containing key point mutations that abrogate binding to Fc gamma receptors.

This full-length, reformatted mouse antibody was made using the variable domain sequences of the original Mouse scFv format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Mouse IgG1, Fc Silent™, Kappa

Clone Number: I5-8

Alternative Name(s) of Target: MIG; MIG/CXCL9; Monokine induced by Interferon gamma

UniProt Accession Number of Target Protein: Q07325

Published Application(s): WB, ELISA

Published Species Reactivity: Human

Immunogen: Biotinylated human MIG.

Specificity: The antibody binds specifically to MIG/CXCL9.

Application Notes: The antibody binds to monokine induced by interferon-gamma, a T-cell chemoattractant that interacts with chemokine receptor CXCR3 and is degraded by matrix metalloproteinase 9.

Antibody First Published in: Eteshola E. Isolation of scFv fragments specific for monokine induced by interferon-gamma (MIG) using phage display. Journal of Immunological Methods 2010; 358:104-110 [PMID:](#)

Note on publication: Describes the generation of scFvs by phage display and ELISA-based affinity characterization.

Product Form

Size: 200 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
