Anti-Breast Epithelial Mucin [BrE-3] Standard Size Ab00380-23.0

This chimeric rabbit antibody was made using the variable domain sequences of the original murine IgG1 format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Rabbit IgG, Kappa

Clone Number: BrE-3

Alternative Name(s) of Target: BEM

UniProt Accession Number of Target Protein: P15941

Published Application(s): ELISA

Published Species Reactivity: Human

Immunogen: Human recombinant Breast Epithelial Mucin.

Specificity: The antibody binds to BEM with a Kd of 37.5 nM.

Application Notes: The antibody binds to human breast epithelial mucin, a gel forming extracellular protein frequently overexpressed in human cancers.

Antibody First Published in: Couto et al. Cloning of cDNAs encoding the variable domains of antibody BrE-3 and construction of a chimeric antibody. Hybridoma 1993; 12(1):15--23 [PMID:8454302](#)

Note on publication: Describes the generation of a chimeric human/mouse anti-mucin antibody.

Product Form

Size: 200 µg Purified antibody.

Purification: Protein A affinity purified

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
