Anti-A2A-Adenosine Receptor [Ig2838] Standard Size Ab00387-10.7

This antibody is in our proprietary AbFab2™ recombinant F(ab2) format - based on Human IgG1 sequence with a short dimerization domain to improve stability and a his tag.

This chimeric human antibody was made using the variable domain sequences of the original Mouse IgG1 format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human F(ab)2, AbFab2™ His-Tagged, Kappa

Clone Number: Ig2838

Alternative Name(s) of Target: ADORA2A

UniProt Accession Number of Target Protein: P29274

Published Application(s): Blocking, ELISA

Published Species Reactivity: Human

Immunogen: Human recombinant A2-adenosine receptor.

Specificity: This antibody binds specifically to the human A2 adenosine receptor.

Application Notes: This antibody binds to the A2 adenosine receptor, a G-protein-coupled receptor for adenosine that, upon ligand binding, activates adenylyl cyclase. The antibody acts as an allosteric inhibitor.

Antibody First Published in: Hino et al. G-protein coupled receptor inactivation by an allosteric inverse-agonist antibody. Nature 2012; 482(7384):237-240 [PMID:22286059](#)

Note on publication: Describes the generation of an anti-adenosine receptor antibody and crystallization for structure determination.

Product Form

Size: 100 µg Purified antibody.

Purification: Purified by Immobilized Metal Affinity Chromatography

Supplied In: PBS with 0.02% Proclin 300.

Storage Recommendation: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic

procedures for humans or animals.
