Anti-Hairpin DNA [DNA-1] Bulk Size Ab00415-23.0-BT

This chimeric rabbit antibody was made using the variable domain sequences of the original Mouse IgG1 format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Rabbit IgG, Kappa

Clone Number: DNA-1

Alternative Name(s) of Target:

UniProt Accession Number of Target Protein:

Published Application(s): WB, ELISA

Published Species Reactivity:

Immunogen: Derived from bacteriophage display library of IgG fragments derived from the immunoglobulin repertoire of an autoimmune SLE-like MRL7/lpr mouse.

Specificity: Binds to hairpin-ssDNA; the DNA-fragment-ligand used is 5'-d [CTG(CCTT)CAG]-3'.

Application Notes: This antibody binds to single-stranded hairpin DNA, which is a secondary structural feature of DNA relevant in replication, bacterial conjugation or viral infections.

Antibody First Published in: Ou et al. Impact of DNA hairpin folding energetics on antibody-ssDNA association. Journal of Molecular Biology 2007; 374(4)1029-1040 [PMID:18028946](#)

Note on publication: Describes the generation of a monoclonal antibody against hairpin-DNA and subsequent crystallisation.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg /ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
