## Anti-BMP receptor type IA [AbD1556] Standard Size Ab00426-1.1

This chimeric mouse antibody was made using the variable domain sequences of the original Human Fab format, for improved compatibility with existing reagents, assays and techniques.

**Isotype and Format:** Mouse IgG1, Lambda

**Clone Number:** AbD1556

**Alternative Name(s) of Target:** BMPR-IA

**UniProt Accession Number of Target Protein:** P36894

**Published Application(s):** Blocking, SPR, ELISA

**Published Species Reactivity:** Human

**Immunogen:** Biotinylated BMPR-IA immobilized on a resin.

**Specificity:** The antibody binds to human BMPR-IA with a low nanomolar affinity.

**Application Notes:** This antibody binds to human BMPR-1A, which, on ligand binding, forms a receptor complex acting as a serine/threonine kinase, activating SMAD transcriptional regulators. They positively regulate chondrocyte differentiation, for example. The antibody neutralizes BMP-binding to the receptor.

**Antibody First Published in:** Harth et al. A selection fit mechanism in BMP receptor IA as a possible source for BMP ligand-receptor promiscuity. PLOS One 2010; 5(9): e13049 [PMID:20927405](#)

**Note on publication:** Describes the generation of several anti BMPR-IA antibodies and subsequent crystallisation as well as binding studies.

### Product Form

**Size:** 200 µg Purified antibody.

**Purification:** Protein A affinity purified

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
