Anti-BMP receptor type IA [AbD1556] Bulk Size Ab00426-10.7-BT

This antibody is in our proprietary AbFab2™ recombinant F(ab2) format - based on Human IgG1 sequence with a short dimerization domain to improve stability and a his tag.

This reformatted human antibody was made using the variable domain sequences of the original Human Fab format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human F(ab)2, AbFab2™ His-Tagged, Lambda

Clone Number: AbD1556

Alternative Name(s) of Target: BMPR-IA

UniProt Accession Number of Target Protein: P36894

Published Application(s): Blocking, SPR, ELISA

Published Species Reactivity: Human

Immunogen: Biotinylated BMPR-IA immobilized on a resin.

Specificity: The antibody binds to human BMPR-IA with a low nanomolar affinity.

Application Notes: This antibody binds to human BMPR-1A, which, on ligand binding, forms a receptor complex acting as a serine/threonine kinase, activating SMAD transcriptional regulators. They positively regulate chondrocyte differentiation, for example. The antibody neutralizes BMP-binding to the receptor.

Antibody First Published in: Harth et al. A selection fit mechanism in BMP receptor IA as a possible source for BMP ligand-receptor promiscuity. PLOS One 2010; 5(9): e13049 [PMID:20927405](#)

Note on publication: Describes the generation of several anti BMPR-IA antibodies and subsequent crystallisation as well as binding studies.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Purified by Immobilized Metal Affinity Chromatography

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

Concentration: 1 mg /ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
