## Anti-Alkaline phosphatase [VI-AP (2D5/5B8)] Bulk Size Ab02777-23.0-BT

This chimeric rabbit antibody was made using the variable domain sequences of the original Mouse IgG1 format for improved compatibility with existing reagents assays and techniques.

**Isotype and Format:** Rabbit IgG, Kappa

**Clone Number:** VI-AP (2D5/5B8)

**Alternative Name(s) of Target:** ALP

**UniProt Accession Number of Target Protein:** P26151

**Published Application(s):** ICC, FC, IF

**Published Species Reactivity:** Cow

**Immunogen:** The original mouse IgG1 version of this antibody was raised by immunizing mice against calf alkaline phosphatase.

**Specificity:** This antibody recognizes the calf alkaline phosphatase enzyme, and does not cross-react with humans.

**Application Notes:** This original mouse IgG1 antibody mostly gets used as a negative control antibody, as the name suggests. One group used the antibody with immunofluorescence to control for other factors that could provide cell lysis, and provide a better view on how effective their own antibodies were (Sugita et al., 1986; PMID: 3456339). Another group used this antibody as a negative control in an immunofluorescence assay measuring the expression of certain antigens on human T-cells (Pickl et al., 1996; PMID: 8707334). A final group used the antibody with immunocytochemistry and flow cytochemistry as negative control in their research about the oncological proliferation marker Ki-76 (Nies et al., 2018; PMID: 30176186)

**Antibody First Published in:** Sugita et al. Use of a cocktail of monoclonal antibodies and human complement in selective killing of acute lymphocytic leukemia cells. *Int J Cancer*. 1986 Mar 15;37(3):351-7  
[PMID:3456339](#)

**Note on publication:** It is the first mention of the original VI-AP clone, and describes the usage of this antibody

### Product Form

**Size:** 1 mg Purified antibody in bulk size.

**Purification:**

Protein A affinity purified

**Supplied In:** PBS only.

**Storage Recommendation:** Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note – This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
