

## Produktinformation

Forschungsprodukte & Biochemikalien
Zellkultur & Verbrauchsmaterial
Diagnostik & molekulare Diagnostik
Laborgeräte & Service

Weitere Information auf den folgenden Seiten! See the following pages for more information!

Lieferung & Zahlungsart siehe unsere Liefer- und Versandbedingungen

## Zuschläge

- Mindermengenzuschlag
- Trockeneiszuschlag
- Gefahrgutzuschlag
- Expressversand

## PTK2 & APC Protein Protein Interaction Antibody Pair

Catalog #: DI0052

規格:[1Set]

List All

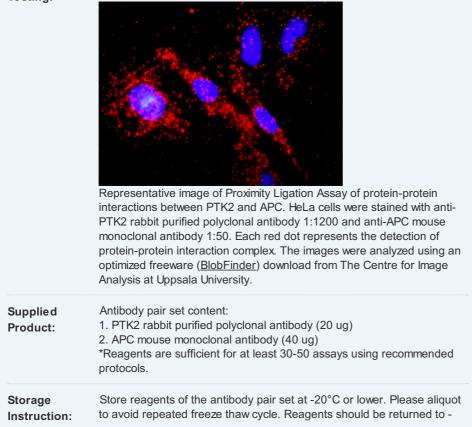

**Reactivity:** 

Human

Quality Control Protein protein interaction immunofluorescence result.

Testing:

	20°C starses immediately after use
	20°C storage immediately after use.
MSDS:	m Download
Publication Reference

Applications	
<i>In situ</i> Proximity Ligation Assay (Cell)	
APC PTK2	
Gene Information	on
Entrez GenelD:	<u>5747</u>
Gene Name:	PTK2
Gene Alias:	FADK,FAK,FAK1,pp125FAK
Gene Description:	PTK2 protein tyrosine kinase 2
Omim ID:	<u>600758</u>
Gene Ontology: <u>Hyperlink</u>	
Gene Summary	This gene encodes a cytoplasmic protein tyrosine kinase which is found concentrated in the focal adhesions that form between cells growing in the presence of extracellular matrix constituents. The encoded protein is a member of the FAK subfamily of protein tyrosine kinases but lacks significant sequence similarity to kinases from other subfamilies. Activation of this gene may be an important early step in cell growth and intracellular signal transduction pathways triggered in response to certain neural peptides or to cell interactions with the extracellular matrix. At least four transcript variants encoding four different isoforms have been found for this gene, but the full-length natures of only two of them have been determined. [provided by RefSeq
Other Designations:	focal adhesion kinase 1
Gene Information	
Entrez GenelD:	324
Gene Name:	APC
Gene Alias:	BTPS2,DP2,DP2.5,DP3,GS
Gene Description:	adenomatous polyposis coli
Omim ID:	<u>135290, 137215, 155255, 175100, 276300</u>
Gene Ontology	: <u>Hyperlink</u>
Gene Summary	: This gene encodes a tumor suppressor protein that acts as an antagonist of the Wnt signaling pathway. It is also involved in other

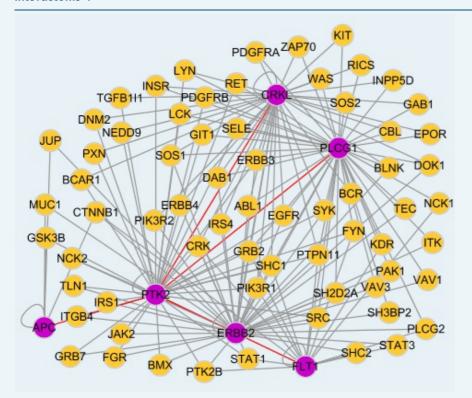

antagonist of the Wnt signaling pathway. It is also involved in other processes including cell migration and adhesion, transcriptional

activation, and apoptosis. Defects in this gene cause familial adenomatous polyposis (FAP), an autosomal dominant pre-malignant disease that usually progresses to malignancy. Disease-associated mutations tend to be clustered in a small region designated the mutation cluster region (MCR) and result in a truncated protein product. [provided by RefSeq

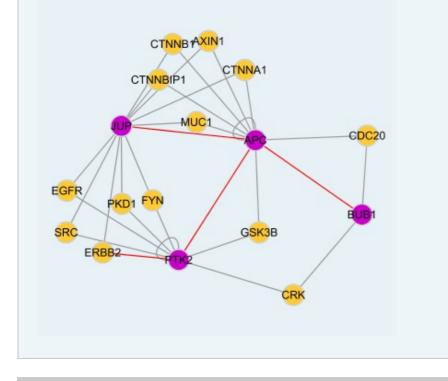

adenomatosis polyposis coli tumor suppressor
