PARD3 & CTNNB1 Protein Protein Interaction Antibody Pair

Catalog # : DI0152 規格:[1 Set]

List All

Specification

Product Description:

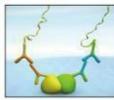

This protein protein interaction antibody pair set comes with two antibodies to detect the protein-protein interaction, one against the PARD3 protein, and the other against the CTNNB1 protein for use in *in* situ Proximity Ligation Assay. See Publication Reference below.

Application Image

In situ Proximity Ligation Assay (Cell)

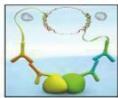

1. Incubate with target primary antibodies

2. Add PLA probes PLUS and MINUS

3. Hybridize connector oligos

4. Ligation to form a complete DNA circle

5. Rolling circle amplification

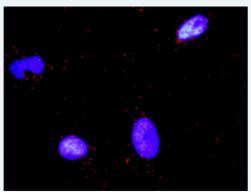

6. Add fluorescent probes to reveal interaction

Reactivity:

Human

Quality Control Protein protein interaction immunofluorescence result.

Testing:

Representative image of Proximity Ligation Assay of protein-protein interactions between PARD3 and CTNNB1. HeLa cells were stained with anti-PARD3 rabbit purified polyclonal antibody 1:1200 and anti-CTNNB1 mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex. The images were analyzed using an optimized freeware (BlobFinder) download from The Centre for Image Analysis at Uppsala University.

Supplied **Product:**

Antibody pair set content:

- 1. PARD3 rabbit purified polyclonal antibody (20 ug)
- 2. CTNNB1 mouse monoclonal antibody (40 ug)

*Reagents are sufficient for at least 30-50 assays using recommended protocols.

Storage Instruction:

Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -

MSDS:

Publication Reference

 An analysis of protein-protein interactions in cross-talk pathways reveals CRKL as a novel prognostic marker in hepatocellular carcinoma.
Liu CH, Chen TC, Chau GY, Jan YH, Chen CH, Hsu CN, Lin KT, Juang YL, Lu PJ, Cheng HC, Chen MH, Chang CF, Ting YS, Kao CY, Hsiao M, Huang CY. Mol Cell Proteomics. 2013 Feb 8. [Epub ahead of print]

Applications

In situ Proximity Ligation Assay (Cell)

CTNNB1 PARD3

Gene Information

Entrez GeneID: 56288

Gene Name: PARD3

Gene Alias: ASIP, Baz, Bazooka, FLJ21015, PAR3, PAR3alpha, PARD3A, SE2-

5L16,SE2-5LT1,SE2-5T2

Gene par-3 partitioning defective 3 homolog (C. elegans)

Description:

Omim ID: 606745

Gene Ontology: Hyperlink

Gene Summary: PARD proteins, which were first identified in C. elegans, are essential

for asymmetric cell division and polarized growth, whereas CDC42 (MIM 116952) mediates the establishment of cell polarity. The CDC42 GTPase, which is controlled by nucleotide exchange factors (GEFs; see MIM 606057) and GTPase-activating proteins (GAPs; see MIM 604980), interacts with a large set of effector proteins that typically contain a CDC42/RAC (MIM 602048)-interactive binding (CRIB) domain.[supplied]

by OMIM

Other OTTHUMP00000019428, atypical PKC isotype-specific interacting

Designations: protein, partitioning-defective protein 3 homolog

Gene Information

Entrez GeneID: 1499

Gene Name: CTNNB1

Gene Alias: CTNNB,DKFZp686D02253,FLJ25606,FLJ37923

Gene catenin (cadherin-associated protein), beta 1, 88kDa

Description:

Omim ID: <u>114550</u>, <u>116806</u>, <u>132600</u>, <u>155255</u>

Gene Ontology: Hyperlink

Gene Summary: Beta-catenin is an adherens junction protein. Adherens junctions (AJs;

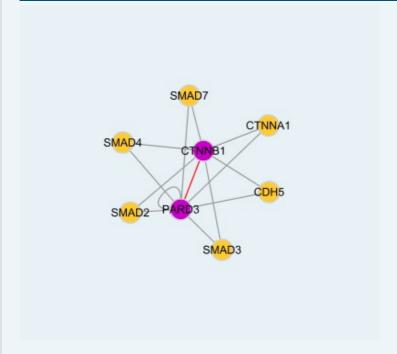

also called the zonula adherens) are critical for the establishment and maintenance of epithelial layers, such as those lining organ surfaces. AJs mediate adhesion between cells, communicate a signal that neighboring cells are present, and anchor the actin cytoskeleton. In

serving these roles, AJs regulate normal cell growth and behavior. At several stages of embryogenesis, wound healing, and tumor cell metastasis, cells form and leave epithelia. This process, which involves the disruption and reestablishment of epithelial cell-cell contacts, may be regulated by the disassembly and assembly of AJs. AJs may also function in the transmission of the 'contact inhibition' signal, which instructs cells to stop dividing once an epithelial sheet is complete. [supplied by OMIM

Other Designations:

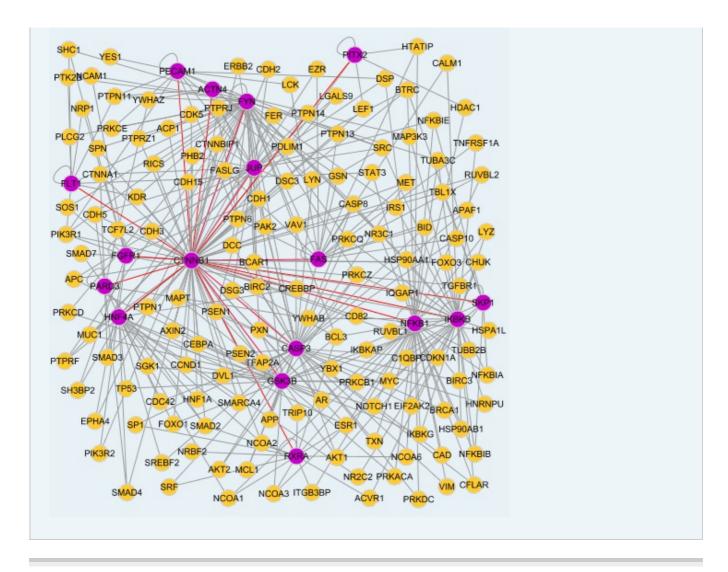

OTTHUMP00000165222,OTTHUMP00000165223,catenin (cadherinassociated protein), beta 1 (88kD),catenin beta-1
