CRK & SOS1 Protein Protein Interaction Antibody Pair

Catalog #: DI0298 規格:[1 Set]

List All

Specification

Product Description:

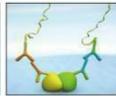

This protein protein interaction antibody pair set comes with two antibodies to detect the protein-protein interaction, one against the CRK protein, and the other against the SOS1 protein for use in in situ Proximity Ligation Assay. See Publication Reference below.

Application Image

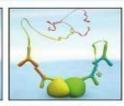

In situ Proximity Ligation Assay (Cell)

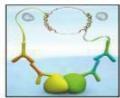

1. Incubate with target primary antibodies

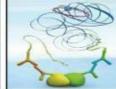

2. Add PLA probes PLUS and MINUS

3. Hybridize connector oligos

4. Ligation to form a complete DNA circle

5. Rolling circle amplification

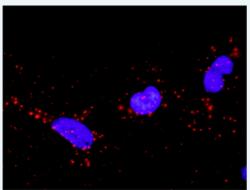

6. Add fluorescent probes to reveal interaction

Reactivity:

Human

Quality Control Protein protein interaction immunofluorescence result.

Testing:

Representative image of Proximity Ligation Assay of protein-protein interactions between CRK and SOS1. HeLa cells were stained with anti-CRK rabbit purified polyclonal antibody 1:1200 and anti-SOS1 mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex. The images were analyzed using an optimized freeware (BlobFinder) download from The Centre for Image Analysis at Uppsala University.

Supplied **Product:**

Antibody pair set content:

- 1. CRK rabbit purified polyclonal antibody (20 ug)
- 2. SOS1 mouse monoclonal antibody (40 ug)

*Reagents are sufficient for at least 30-50 assays using recommended protocols.

Storage Instruction:

Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -

Publication Reference

1. An analysis of protein-protein interactions in cross-talk pathways reveals CRKL as a novel prognostic marker in hepatocellular carcinoma. Liu CH, Chen TC, Chau GY, Jan YH, Chen CH, Hsu CN, Lin KT, Juang YL, Lu PJ, Cheng HC, Chen MH, Chang CF, Ting YS, Kao CY, Hsiao M, Huang CY. Mol Cell Proteomics. 2013 Feb 8. [Epub ahead of print]

Applications

In situ Proximity Ligation Assay (Cell)

CRK SOS1

Gene Information

Entrez GeneID: 1398

Gene Name: **CRK**

Gene Alias: **CRKII**

v-crk sarcoma virus CT10 oncogene homolog (avian) Gene

Description:

Omim ID: 164762

Gene Ontology: Hyperlink

Gene Summary: This gene encodes a member of an adapter protein family that binds to

several tyrosine-phosphorylated proteins. The product of this gene has several SH2 and SH3 domains (src-homology domains) and is involved in several signaling pathways, recruiting cytoplasmic proteins in the vicinity of tyrosine kinase through SH2-phosphotyrosine interaction. The N-terminal SH2 domain of this protein functions as a positive regulator of transformation whereas the C-terminal SH3 domain functions as a negative regulator of transformation. Two alternative transcripts encoding different isoforms with distinct biological activity have been

described. [provided by RefSeq

Other avian sarcoma virus CT10 (v-crk) oncogene homolog,v-crk avian Designations: sarcoma virus CT10 oncogene homolog, v-crk sarcoma virus CT10

oncogene homolog

Gene Information

Entrez GeneID: 6654

Gene Name: SOS1

Gene Alias: GF1,GGF1,GINGF,HGF,NS4

Gene son of sevenless homolog 1 (Drosophila)

Description:

Omim ID: <u>135300</u>, <u>182530</u>, <u>610733</u>

Gene Ontology: Hyperlink

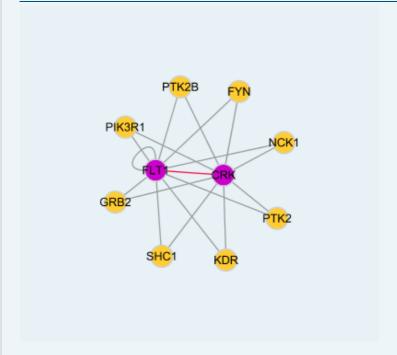

Gene Summary: This gene encodes a protein that is a guanine nucleotide exchange

factor for RAS proteins, membrane proteins that bind guanine nucleotides and participate in signal transduction pathways. GTP binding activates and GTP hydrolysis inactivates RAS proteins. The product of this gene may regulate RAS proteins by facilitating the exchange of GTP for GDP. Mutations in this gene are associated with gingival fibromatosis 1 and Noonan syndrome type 4. [provided by RefSeq

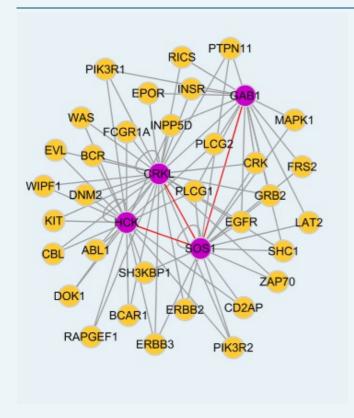

Other Designations:

OTTHUMP00000128306,gingival fibromatosis, hereditary, 1,guanine nucleotide exchange factor,son of sevenless homolog 1
