## CDK4 & CCND1 Protein Protein Interaction Antibody Pair

Catalog #: DI0556 規格:[1 Set]

#### List All

## **Specification**

## **Product Description:**

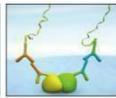

This protein protein interaction antibody pair set comes with two antibodies to detect the protein-protein interaction, one against the CDK4 protein, and the other against the CCND1 protein for use in in situ Proximity Ligation Assay. See Publication Reference below.

## **Application Image**

In situ Proximity Ligation Assay (Cell)

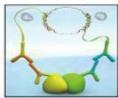

1. Incubate with target primary antibodies

2. Add PLA probes PLUS and MINUS

3. Hybridize connector oligos

4. Ligation to form a complete DNA circle

5. Rolling circle amplification

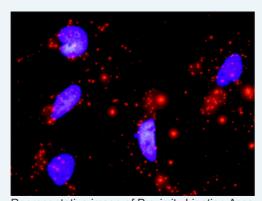

6. Add fluorescent probes to reveal interaction

Reactivity:

Human

Quality Control Protein protein interaction immunofluorescence result.

Testing:

Representative image of Proximity Ligation Assay of protein-protein interactions between CDK4 and CCND1. HeLa cells were stained with anti-CDK4 rabbit purified polyclonal antibody 1:1200 and anti-CCND1 mouse purified polyclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex. The images were analyzed using an optimized freeware (BlobFinder) download from The Centre for Image Analysis at Uppsala University.

## Supplied **Product:**

Antibody pair set content:

- 1. CDK4 rabbit purified polyclonal antibody (20 ug)
- 2. CCND1 mouse purified polyclonal antibody (40 ug)

\*Reagents are sufficient for at least 30-50 assays using recommended protocols.

## **Storage** Instruction:

Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -

#### **Publication Reference**

 An analysis of protein-protein interactions in cross-talk pathways reveals CRKL as a novel prognostic marker in hepatocellular carcinoma.

### **Applications**

In situ Proximity Ligation Assay (Cell)

CCND1 CDK4

#### **Gene Information**

Entrez GeneID: 1019

Gene Name: CDK4

Gene Alias: CMM3,MGC14458,PSK-J3

Gene cyclin-dependent kinase 4

**Description:** 

Omim ID: <u>123829</u>, <u>609048</u>

Gene Ontology: Hyperlink

Gene Summary: The protein encoded by this gene is a member of the Ser/Thr protein

kinase family. This protein is highly similar to the gene products of S. cerevisiae cdc28 and S. pombe cdc2. It is a catalytic subunit of the protein kinase complex that is important for cell cycle G1 phase progression. The activity of this kinase is restricted to the G1-S phase, which is controlled by the regulatory subunits D-type cyclins and CDK inhibitor p16(INK4a). This kinase was shown to be responsible for the phosphorylation of retinoblastoma gene product (Rb). Mutations in this gene as well as in its related proteins including D-type cyclins, p16(INK4a) and Rb were all found to be associated with tumorigenesis of a variety of cancers. Multiple polyadenylation sites of this gene have

been reported. [provided by RefSeq

Other cell division kinase 4, melanoma cutaneous malignant, 3

Designations:

#### Gene Information

Entrez GenelD: 595

Gene Name: CCND1

Gene Alias: BCL1,D11S287E,PRAD1,U21B31

Gene cyclin D1

Description:

Omim ID: <u>151400</u>, <u>168461</u>, <u>193300</u>, <u>254500</u>

Gene Ontology: Hyperlink

**Gene Summary:** The protein encoded by this gene belongs to the highly conserved cyclin family, whose members are characterized by a dramatic

Page 2 of 3 2016/5/20

periodicity in protein abundance throughout the cell cycle. Cyclins function as regulators of CDK kinases. Different cyclins exhibit distinct expression and degradation patterns which contribute to the temporal coordination of each mitotic event. This cyclin forms a complex with and functions as a regulatory subunit of CDK4 or CDK6, whose activity is required for cell cycle G1/S transition. This protein has been shown to interact with tumor suppressor protein Rb and the expression of this gene is regulated positively by Rb. Mutations, amplification and overexpression of this gene, which alters cell cycle progression, are observed frequently in a variety of tumors and may contribute to tumorigenesis. [provided by RefSeq

Other Designations:

B-cell CLL/lymphoma 1,G1/S-specific cyclin D1
