MDM2(phospho T218) & MDM2 Protein Phosphorylation Antibody Pair

Catalog # : DP0073

規格 : [1 Set]

List All

Specification

Product Description: This protein phosphorylation antibody pair set comes with two antibodies, one against the MDM2 protein, and the other against the specific T218 phosphorylated site of MDM2 for use in *in situ* Proximity Ligation Assay. See Publication Reference below.

Application Image

In situ Proximity Ligation Assay
(Cell)

Reactivity: Human

Quality Control Testing: Dual recognition immunofluorescence result.

Testing:

Representative image of Proximity Ligation Assay of protein phosphorylation. HeLa cells were stained with dual recognition antibody pair set, rabbit polyclonal antibody 1:1200 and mouse monoclonal antibody 1:50. Each red dot represents one single phosphorylated protein. The images were analyzed using an optimized freeware ([BlobFinder](#)) download from The Centre for Image Analysis at Uppsala University.

Supplied Product: Antibody pair set content:
 1. Phospho-MDM2 T218 rabbit polyclonal antibody (20 ul)
 In PBS (0.09% (w/v) sodium azide)
 2. MDM2 mouse monoclonal antibody (40 ug)
 In 1x PBS, pH 7.2
 *Reagents are sufficient for at least 30-50 assays using recommended protocols.

Storage Store reagents of the antibody pair set at -20°C or lower. Please aliquot
Instruction: to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

In situ Proximity Ligation Assay (Cell)

Gene Information

Entrez GeneID: [4193](#)

Gene Name: MDM2

Gene Alias: HDMX,MGC71221,hdm2

Gene Description: Mdm2 p53 binding protein homolog (mouse)

Omim ID: [164785](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene is a target gene of the transcription factor tumor protein p53. The encoded protein is a nuclear phosphoprotein that binds and inhibits transactivation by tumor protein p53, as part of an autoregulatory negative feedback loop. Overexpression of this gene can result in excessive inactivation of tumor protein p53, diminishing its tumor suppressor function. This protein has E3 ubiquitin ligase activity, which targets tumor protein p53 for proteasomal degradation. This protein also affects the cell cycle, apoptosis, and tumorigenesis through interactions with other proteins, including retinoblastoma 1 and ribosomal protein L5. More than 40 different alternatively spliced transcript variants have been isolated from both tumor and normal tissues. [provided by RefSeq]

Other Designations: Mdm2, transformed 3T3 cell double minute 2, p53 binding protein, double minute 2, human homolog of; p53-binding protein, mouse double minute 2 homolog, p53-binding protein MDM2, ubiquitin-protein ligase E3 Mdm2
