PLCG2(Phospho Y1217) & PLCG2 Protein Phosphorylation Antibody Pair

Catalog # : DP0295

規格 : [1 Set]

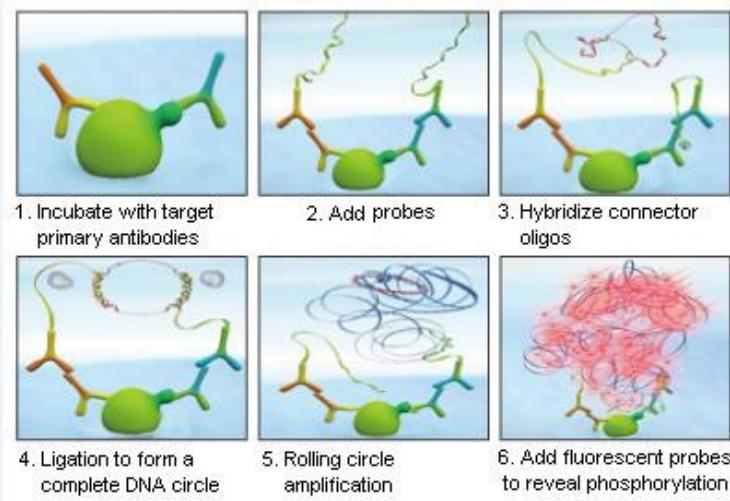

List All

Specification

Product Description: This protein phosphorylation antibody pair set comes with two antibodies, one against the PLCG2 protein, and the other against the specific Y1217 phosphorylated site of PLCG2 for use in *in situ* Proximity Ligation Assay. See Publication Reference below.

Application Image

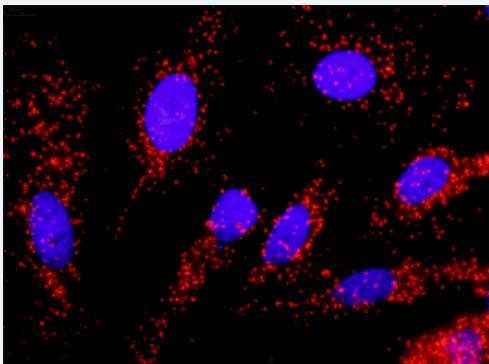

In situ Proximity Ligation Assay (Cell)

Reactivity: Human

Quality Control Dual recognition immunofluorescence result.

Testing:

Representative image of Proximity Ligation Assay of protein phosphorylation. HeLa cells were stained with dual recognition antibody pair set, rabbit polyclonal antibody 1:1200 and mouse purified polyclonal antibody 1:50. Each red dot represents one single phosphorylated protein. The images were analyzed using an optimized freeware ([BlobFinder](#)) download from The Centre for Image Analysis at Uppsala University.

Supplied Product:

Antibody pair set content:

1. Phospho-PLCG2 Y1217 rabbit polyclonal antibody (20 ul)
In PBS (without Mg²⁺ and Ca²⁺), 150 mM NaCl, pH 7.4 (0.02% sodium azide, 50% glycerol)
2. PLCG2 mouse purified polyclonal antibody (40 ug)
In 1x PBS, pH 7.2

*Reagents are sufficient for at least 30-50 assays using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Publication Reference

1. In situ detection of phosphorylated platelet-derived growth factor receptor beta using a generalized proximity ligation method.

Proc Natl Acad Sci U S A. 2004 Jun 1;101(22):8420-4. Epub 2004 May 21.
4. Protein detection using proximity-dependent DNA ligation assays.
Fredriksson S, Gullberg M, Jarvius J, Olsson C, Pietras K, Gustafsdottir SM, Ostman A, and Landegren U.
Nat Biotechnol. 2002 May;20(5):473-7.
5. Highly specific detection of phosphorylated proteins by Duolink
Mats Gullberg and Ann-Catrin Andersson
Nature Methods 6. 2009

Applications

In situ Proximity Ligation Assay (Cell)

Gene Information

Entrez GeneID: [5336](#)

Gene Name: PLCG2

Gene Alias: -

Gene phospholipase C, gamma 2 (phosphatidylinositol-specific)

Description:

Omim ID: [600220](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: Enzymes of the phospholipase C family catalyze the hydrolysis of phospholipids to yield diacylglycerols and water-soluble phosphorylated derivatives of the lipid head groups. A number of these enzymes have specificity for phosphoinositides. Of the phosphoinositide-specific phospholipase C enzymes, C-beta is regulated by heterotrimeric G protein-coupled receptors, while the closely related C-gamma-1 (PLCG1; MIM 172420) and C-gamma-2 enzymes are controlled by receptor tyrosine kinases. The C-gamma-1 and C-gamma-2 enzymes are composed of phospholipase domains that flank regions of homology to noncatalytic domains of the SRC oncogene product, SH2 and SH3.
[supplied by OMIM]

Other phospholipase C gamma 2, phospholipase C, gamma 2, phospholipase Designations: C, gamma 2 (phosphatidylinositol-specific)
