ANXA5 (Human) Matched Antibody Pair

Catalog # : H00000308-AP11

規格 : [1 Set]

List All

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human ANXA5.

Reactivity: Human

Quality Control Testing: Standard curve using recombinant protein (H00000308-P01) as an analyte.

Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.

Supplied Product: Antibody pair set content:
 1. Capture antibody: rabbit MaxPab® affinity purified polyclonal anti-ANXA5 (100 ug)
 2. Detection antibody: mouse monoclonal anti-ANXA5, IgG1 Kappa (20 ug)
 *Reagents are sufficient for at least 1-2 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [308](#)

Gene Name: ANXA5

Gene Alias: ANX5, ENX2, PP4

Gene Description: annexin A5

Omim ID: [131230](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The protein encoded by this gene belongs to the annexin family of calcium-dependent phospholipid binding proteins some of which have been implicated in membrane-related events along exocytotic and endocytotic pathways. Annexin 5 is a phospholipase A2 and protein kinase C inhibitory protein with calcium channel activity and a potential role in cellular signal transduction, inflammation, growth and differentiation. Annexin 5 has also been described as placental anticoagulant protein I, vascular anticoagulant-alpha, endonexin II, lipocortin V, placental protein 4 and anchorin CII. The gene spans 29 kb containing 13 exons, and encodes a single transcript of approximately 1.6 kb and a protein product with a molecular weight of about 35 kDa. [provided by RefSeq]

Other Designations: anchorin CII,annexin 5,endonexin II,lipocortin V,placental anticoagulant protein I
