CD79B (Human) Matched Antibody Pair

Catalog # : H00000974-AP52

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human CD79B.

Reactivity: Human

Quality Control Testing: Standard curve using CD79B 293T overexpression lysate (non-denatured) as an analyte.

Sandwich ELISA detection sensitivity ranging from approximately 6561x to 9x dilution of the CD79B 293T overexpression lysate (non-denatured).

Supplied Product: Antibody pair set content:
 1. Capture antibody: mouse monoclonal anti-CD79B, IgG1 Kappa (300 ug)
 2. Detection antibody: rabbit polyclonal anti-CD79B (50 ul)
 *Reagents are sufficient for at least 3-5 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Applications

ELISA Pair (Transfected lysate)

Gene Information

Entrez GeneID: [974](#)

Gene Name: CD79B

Gene Alias: B29, IGB

Gene Description: CD79b molecule, immunoglobulin-associated beta

Omim ID: [147245](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: The B lymphocyte antigen receptor is a multimeric complex that includes

the antigen-specific component, surface immunoglobulin (Ig). Surface Ig non-covalently associates with two other proteins, Ig-alpha and Ig-beta, which are necessary for expression and function of the B-cell antigen receptor. This gene encodes the Ig-beta protein of the B-cell antigen component. Alternatively spliced transcript variants encoding different isoforms have been described. [provided by RefSeq

Other Designations: B-cell antigen receptor complex-associated protein beta chain, B-cell-specific glycoprotein B29, CD79B antigen, CD79b antigen (immunoglobulin-associated beta), Ig-beta, immunoglobulin-associated B29
