CDC25C (Human) Matched Antibody Pair

Catalog # : H00000995-AP21

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human CDC25C.

Reactivity: Human

Quality Control Testing: Standard curve using recombinant protein (H00000995-P01) as an analyte.

Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.

Supplied Product: Antibody pair set content:
 1. Capture antibody: rabbit MaxPab® affinity purified polyclonal anti-CDC25C (100 ug)
 2. Detection antibody: mouse polyclonal anti-CDC25C (40 ul)
 *Reagents are sufficient for at least 3-5 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [995](#)

Gene Name: CDC25C

Gene Alias: CDC25

Gene Description: cell division cycle 25 homolog C (S. pombe)

Omim ID: [157680](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene is highly conserved during evolution and it plays a key role in the regulation of cell division. The encoded protein is a tyrosine phosphatase and belongs to the Cdc25 phosphatase family. It directs dephosphorylation of cyclin B-bound CDC2 and triggers entry into mitosis. It is also thought to suppress p53-induced growth arrest. Multiple alternatively spliced transcript variants of this gene have been described, however, the full-length nature of many of them is not known. [provided by RefSeq]

Other Designations: cell division cycle 25C, cell division cycle 25C protein, dual specificity phosphatase CDC25C, m-phase inducer phosphatase 3, mitosis inducer CDC25, phosphotyrosine phosphatase
