FTL (Human) IP-WB Antibody Pair

Catalog # : H00002512-PW2

規格 : [1 Set]

List All

Specification

Product Description: This IP-WB antibody pair set comes with one antibody for immunoprecipitation and another to detect the precipitated protein in western blot.

Reactivity: Human

Quality Control Testing: Immunoprecipitation-Western Blot (IP-WB)

Immunoprecipitation of FTL transfected lysate using mouse monoclonal anti-FTL and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with rabbit polyclonal anti-FTL.

Supplied Product: Antibody pair set content:
1. Antibody pair for IP: mouse monoclonal anti-FTL (300 ug)
2. Antibody pair for WB: rabbit polyclonal anti-FTL (50 ul)

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [2512](#)

Gene Name: FTL

Gene Alias: MGC71996

Gene Description: ferritin, light polypeptide

Omim ID: [134790](#), [600886](#), [606159](#)

Gene Ontology: [Hyperlink](#)

Application Image

Immunoprecipitation-Western Blot

Gene Summary: This gene encodes the light subunit of the ferritin protein. Ferritin is the major intracellular iron storage protein in prokaryotes and eukaryotes. It is composed of 24 subunits of the heavy and light ferritin chains. Variation in ferritin subunit composition may affect the rates of iron uptake and release in different tissues. A major function of ferritin is the storage of iron in a soluble and nontoxic state. Defects in this light chain ferritin gene are associated with several neurodegenerative diseases and hyperferritinemia-cataract syndrome. This gene has multiple pseudogenes. [provided by RefSeq]

Other Designations: L apoferritin, ferritin L subunit, ferritin L-chain, ferritin light chain, ferritin light polypeptide-like 3
