MIF (Human) Matched Antibody Pair

Catalog # : H00004282-AP11

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human MIF.

Reactivity: Human

Quality Control Testing: Standard curve using recombinant protein (H00004282-P01) as an analyte.

Sandwich ELISA detection sensitivity ranging from 1 ng/ml to 100 ng/ml.

Supplied Product: Antibody pair set content:
 1. Capture antibody: rabbit MaxPab® affinity purified polyclonal anti-MIF (100 ug)
 2. Detection antibody: mouse monoclonal anti-MIF, IgG1 Kappa (20 ug)
 *Reagents are sufficient for at least 1-2 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [4282](#)

Gene Name: MIF

Gene Alias: GIF, GLIF, MMIF

Gene Description: macrophage migration inhibitory factor (glycosylation-inhibiting factor)

Omim ID: [153620](#), [604302](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene encodes a lymphokine involved in cell-mediated immunity, immunoregulation, and inflammation. It plays a role in the regulation of macrophage function in host defense through the suppression of anti-inflammatory effects of glucocorticoids. This lymphokine and the JAB1 protein form a complex in the cytosol near the peripheral plasma membrane, which may indicate an additional role in integrin signaling pathways. [provided by RefSeq]

Other Designations: glycosylation-inhibiting factor,phenylpyruvate tautomerase
