Gene Alias: PSP-C, SFTP2, SMDP2, SP-C

Gene Summary: The SFTPC gene encodes pulmonary-associated surfactant protein C (SPC), an extremely

hydrophobic surfactant protein essential for lung function and homeostasis after birth. It is produced exclusively by type II alveolar epithelial cells in the lung. Pulmonary surfactant is a lipid-rich material that prevents lung collapse by lowering surface tension at the air-liquid interface in the alveoli of lung. Surfactant is composed of phospholipids and other surfactant-associated proteins (Clark and Clark, 2005 [PubMed 15927881]).
