RFXANK (Human) Matched Antibody Pair

Catalog # : H00008625-AP22

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human RFXANK.

Reactivity: Human

Quality Control Testing: Standard curve using recombinant protein (H00008625-P01) as an analyte.

Sandwich ELISA detection sensitivity ranging from 3 ng/ml to 100 ng/ml.

Supplied Product: Antibody pair set content:
 1. Capture antibody: rabbit MaxPab® affinity purified polyclonal anti-RFXANK (100 ug)
 2. Detection antibody: mouse purified polyclonal anti-RFXANK (20 ug)
 *Reagents are sufficient for at least 1-2 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [8625](#)

Gene Name: RFXANK

Gene Alias: ANKRA1,BLS,F14150_1,MGC138628,RFX-B

Gene Description: regulatory factor X-associated ankyrin-containing protein

Omim ID: [209920](#), [603200](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: Major histocompatibility (MHC) class II molecules are transmembrane proteins that have a central role in development and control of the immune system. The protein encoded by this gene, along with regulatory factor X-associated protein and regulatory factor-5, forms a complex that binds to the X box motif of certain MHC class II gene promoters and activates their transcription. Once bound to the promoter, this complex associates with the non-DNA-binding factor MHC class II transactivator, which controls the cell type specificity and inducibility of MHC class II gene expression. This protein contains ankyrin repeats involved in protein-protein interactions. Mutations in this gene have been linked to bare lymphocyte syndrome type II, complementation group B. Two transcript variants encoding different isoforms have been described for this gene, with only one isoform showing activation activity. [provided by RefSeq]

Other Designations: DNA-binding protein RFXANK,RFX-Bdelta4,ankyrin repeat-containing regulatory factor X-associated protein,regulatory factor X subunit B

Gene Pathway

Antigen processing and presentation Primary immunodeficiency
