Datasheet

LRRC8A monoclonal antibody (MF04), clone 8H9 (FITC)

Catalog Number: H00056262-MF04

Regulation Status: For research use only (RUO)

Product Description: FITC conjugated mouse monoclonal antibody raised against a partial recombinant LRRC8A.

Clone Name: 8H9

Immunogen: LRRC8A (NP_062540.2, 711 a.a. ~ 810 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Sequence:

QNLAITANRIETLPPELFQCRKLRLHLGNNVLQSLPSR
VGELTNLTQIELRGNRLECLPVELGECPLLKRSGLVVE
EDLFNTLPPEVKERLWRADKEQA

Host: Mouse

Interspecies Antigen Sequence: Rat (97)

Protocols: See our web site at
<http://www.abnova.com/support/protocols.asp> or product
page for detailed protocols

Conjugation: FITC

Isotype: IgG2a Kappa

Storage Buffer: In 1x PBS, pH 7.4

Storage Instruction: Store at -20°C or lower. Aliquot to
avoid repeated freezing and thawing.

Entrez GeneID: 56262

Gene Symbol: LRRC8A

Gene Alias: FLJ10337, FLJ41617, KIAA1437, LRRC8

Gene Summary: This gene encodes a protein belonging to the leucine-rich repeat family of proteins, which are involved in diverse biological processes, including cell adhesion, cellular trafficking, and hormone-receptor interactions. This family member is a putative four-pass

transmembrane protein that plays a role in B cell development. Defects in this gene cause autosomal dominant non-Bruton type agammaglobulinemia, an immunodeficiency disease resulting from defects in B cell maturation. Multiple alternatively spliced transcript variants, which encode the same protein, have been identified for this gene. [provided by RefSeq]
