Datasheet

IL8 (Human) ELISA Kit

Catalog Number: KA3068

Regulatory Status: For research use only (RUO)

Product Description: IL8 (Human) ELISA Kit is intended for the quantitative measurement of human IL8.

Calibration Range: 15.6 to 1000 pg/mL (Body Fluid, Tissue Lysate, Cell Culture Supernate)
7.8 to 500 pg/mL (Serum, Plasma)

Reactivity: Human

Applications: Quant
(See our web site product page for detailed applications information)

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Storage Instruction: Store at 4°C for 6 months, or at -20°C for 12 months.

Entrez GeneID: 3576

Gene Symbol: IL8

Gene Alias: CXCL8, GCP-1, GCP1, LECT, LUCT, LYNAP, MDNCF, MONAP, NAF, NAP-1, NAP1

Gene Summary: The protein encoded by this gene is a member of the CXC chemokine family. This chemokine is one of the major mediators of the inflammatory response. This chemokine is secreted by several cell types. It functions as a chemoattractant, and is also a potent angiogenic factor. This gene is believed to play a role in the pathogenesis of bronchiolitis, a common respiratory tract disease caused by viral infection. This gene and other ten members of the CXC chemokine gene family form a chemokine gene cluster in a region mapped to chromosome 4q. [provided by RefSeq]
