Infliximab (Human) ELISA Kit (Quantitative)

Catalog Number: KA6972

Regulation Status: For research use only (RUO)

Product Description: Infliximab (Human) ELISA Kit (Quantitative) is the specific and quantitative determination of free Infliximab in serum and plasma.

Calibration Range: 0.01 - 1 ug/mL

Limit of Detection: 3 ng/mL

Suitable Sample: Serum or Plasma

Sample Volume: 10 uL

Absorbance (nm): 450/650 nm

Detection Method: Colorimetric

Regulation Status: For research use only (RUO)

Assay Type: Quantitative

Protocols: See our web site at http://www.abnova.com/support/protocols.asp or product page for detailed protocols

Specificity: This kit is specific for Infliximab only and does not cross-react with other TNF-? capturers.

Storage Instruction: Store the kit at 4°C.

Entrez GeneID: 7124

Gene Symbol: TNF

Gene Alias: DIF, TNF-alpha, TNFA, TNFSF2

Gene Summary: This gene encodes a multifunctional proinflammatory cytokine that belongs to the tumor necrosis factor (TNF) superfamily. This cytokine is mainly secreted by macrophages. It can bind to, and thus functions through its receptors TNFRSF1A/TNFR1 and TNFRSF1B/TNFBR. This cytokine is involved in the regulation of a wide spectrum of biological processes including cell proliferation, differentiation, apoptosis, lipid metabolism, and coagulation. This cytokine has been implicated in a variety of diseases, including autoimmune diseases, insulin resistance, and cancer. Knockout studies in mice also suggested the neuroprotective function of this cytokine. [provided by RefSeq]
