Anti-Ocrelizumab (Human) ELISA Kit

Catalog Number: KA7117

Regulation Status: For research use only (RUO)

Product Description: Anti-Ocrelizumab (Human) ELISA Kit is a kit used for the quantitative measurement of antibodies to Ocrelizumab in human serum and plasma.

Calibration Range: 10 to 160 ng/mL

Limit of Detection: 7.5 ng/mL

Suitable Sample: Plasma, Serum

Sample Volume: 20 μ L

Detection Method: Colorimetric

Absorbance (nm): 450/650

Assay type: Quantitative

Spiking Recovery: 85%-115%

Regulation Status: For research use only (RUO)

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Storage Instruction: Store the kit at 4°C.

Entrez GeneID: 931

Gene Symbol: MS4A1

Gene Alias: B1, Bp35, CD20, LEU-16, MGC3969, MS4A2, S7

Gene Summary: This gene encodes a member of the membrane-spanning 4A gene family. Members of this nascent protein family are characterized by common structural features and similar intron/exon splice boundaries and display unique expression patterns among hematopoietic cells and nonlymphoid tissues. This gene encodes a B-lymphocyte surface molecule which plays a role in the development and differentiation

of B-cells into plasma cells. This family member is localized to 11q12, among a cluster of family members. Alternative splicing of this gene results in two transcript variants which encode the same protein. [provided by RefSeq]
