Datasheet

Omalizumab (Human) ELISA Kit

Catalog Number: KA7126

Regulation Status: For research use only (RUO)

Product Description: Omalizumab (Human) ELISA Kit is a sandwich enzyme immunoassay for the quantitative measurement of Omalizumab in human serum and plasma.

Calibration Range: 2.5 to 160 ng/mL

Limit of Detection: 2.5 ng/mL

Suitable Sample: Citrate Plasma, EDTA Plasma, Heparin Plasma, Serum

Sample Volume: 100 μ L

Detection Method: Colorimetric

Absorbance (nm): 450

Assay type: Quantitative

Spiking Recovery: 80%-120%

Regulation Status: For research use only (RUO)

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Storage Instruction: Store the kit at 4°C.

Entrez GeneID: 9173

Gene Symbol: IL1RL1

Gene Alias: DER4, FIT-1, MGC32623, ST2, ST2L, ST2V, T1

Gene Summary: The protein encoded by this gene is a member of the interleukin 1 receptor family. Studies of the similar gene in mouse suggested that this receptor can be induced by proinflammatory stimuli, and may be involved in the function of helper T cells. This gene, interleukin 1 receptor, type I (IL1R1), interleukin 1 receptor, type II (IL1R2) and interleukin 1 receptor-like 2

(IL1RL2) form a cytokine receptor gene cluster in a region mapped to chromosome 2q12. Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq]
