Anti-Etarnacept (Human) ELISA Kit

Catalog Number: KA7132

Regulation Status: For research use only (RUO)

Product Description: Anti-Etarnacept (Human) ELISA Kit is a kit used for the quantitative measurement of antibodies to Etarnacept in human serum and plasma.

Calibration Range: 40 to 640 ng/mL

Limit of Detection: 30 ng/mL

Suitable Sample: Citrate Plasma, EDTA Plasma, Heparin Plasma, Serum

Sample Volume: 100 μ L

Detection Method: Colorimetric

Absorbance (nm): 450

Assay type: Quantitative

Spiking Recovery: 80%-120%

Regulation Status: For research use only (RUO)

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Storage Instruction: Store the kit at 4°C.

Entrez GeneID: 7124

Gene Symbol: TNF

Gene Alias: DIF, TNF-alpha, TNFA, TNFSF2

Gene Summary: This gene encodes a multifunctional proinflammatory cytokine that belongs to the tumor necrosis factor (TNF) superfamily. This cytokine is mainly secreted by macrophages. It can bind to, and thus functions through its receptors TNFRSF1A/TNFR1 and TNFRSF1B/TNFR2. This cytokine is involved in the regulation of a wide spectrum of biological processes including cell proliferation, differentiation, apoptosis, lipid metabolism, and coagulation. This cytokine has been

implicated in a variety of diseases, including autoimmune diseases, insulin resistance, and cancer. Knockout studies in mice also suggested the neuroprotective function of this cytokine. [provided by RefSeq]
