Anti-insulin asparte (Human) ELISA Kit

Catalog Number: KA7147

Regulation Status: For research use only (RUO)

Product Description: Anti-insulin asparte (Human)
ELISA Kit is a kit used for the qualitative detection of antibodies to Asparte in serum and plasma.

Suitable Sample: Citrate Plasma, EDTA Plasma, Heparin Plasma, Serum

Sample Volume: 100 uL

Detection Method: Colorimetric

Absorbance (nm): 450

Assay type: Qualitative

Spiking Recovery: 80%-120%

Regulation Status: For research use only (RUO)

Protocols: See our web site at
<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Storage Instruction: Store the kit at 4°C.

Entrez GeneID: 3630

Gene Symbol: INS

Gene Alias: ILPR, IRDN

Gene Summary: After removal of the precursor signal peptide, proinsulin is post-translationally cleaved into two chains (peptide A and peptide B) that are covalently linked via two disulfide bonds. Binding of this mature form of insulin to the insulin receptor (INSR) stimulates glucose uptake. A variety of mutant alleles with changes in the coding region have been identified. There is a read-through gene, INS-IGF2, which overlaps with this gene at the 5' region and with the IGF2 gene at the 3' region. [provided by RefSeq]
