Alpha-Amylase Inhibitor Screening Kit

Catalog Number: KA7273

Regulation Status: For research use only (RUO)

Product Description: Alpha-Amylase Inhibitor Screening Kit utilizes fluorescence polarization (FP) to screen for potential Alpha-amylase inhibitors. In this assay, Alpha-amylase cleaves a fluorescent amylose substrate. The decrease in FP is directly proportional to the Alpha-amylase activity in the sample.

Suitable Sample : Compounds that affect α -amylase activity

Detection Method : FP485/520 nm

Regulation Status : For research use only (RUO)

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Storage Instruction: Store at -20°C.
Avoid repeated freezing and thawing.
