Entrez GeneID: 930

Gene Symbol: CD19

Gene Alias: B4, MGC12802

Gene Summary: Lymphocytes proliferate and

differentiate in response to various concentrations of
different antigens. The ability of the B cell to respond in a
specific, yet sensitive manner to the various antigens is
achieved with the use of low-affinity antigen receptors.
This gene encodes a cell surface molecule which
assembles with the antigen receptor of B lymphocytes in
order to decrease the threshold for antigen receptor-
dependent stimulation. [provided by RefSeq]
