Datasheet

PPIB monoclonal antibody, clone CL3901

Catalog Number: MAB15696

Regulatory Status: For research use only (RUO)

Product Description: Mouse monoclonal antibody raised against synthetic peptide of human PPIB.

Clone Name: CL3901

Immunogen: A synthetic peptide corresponding to human PPIB.

Sequence:

TKTDSRDKPLKDVIIADCGKIEVEKPFIAIKE

Host: Mouse

Reactivity: Human, Mouse, Rat

Applications: IHC-P, RNAi, WB

(See our web site product page for detailed applications information)

Protocols: See our web site at

<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Purification: Protein A purification

Isotype: IgG2a

Recommend Usage: Immunohistochemistry

(Formalin/PFA-fixed paraffin-embedded sections)

(1:5000-1:10000)

Western Blot (1:500-1:1000)

The optimal working dilution should be determined by the end user.

Storage Buffer: In PBS, pH 7.2 (40% glycerol, 0.02% sodium azide).

Storage Instruction: Store at 4°C. For long term storage store at -20°C.

Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 5479

Gene Symbol: PPIB

Gene Alias: CYP-S1, CYPB, MGC14109, MGC2224, SCYLP

Gene Summary: The protein encoded by this gene is a cyclosporine-binding protein and is mainly located within the endoplasmic reticulum. It is associated with the secretory pathway and released in biological fluids. This protein can bind to cells derived from T- and B-lymphocytes, and may regulate cyclosporine A-mediated immunosuppression. [provided by RefSeq]
