ALB (Human) Recombinant Protein (Biotin)

Catalog Number: P10362

Regulation Status: For research use only (RUO)

Product Description: Human ALB (P02768-1, Asp25-Leu609) partial recombinant protein with His-Avi tag at the C-Terminus expressed in HEK293 cells.

Sequence: Asp25-Leu609

Host: Human

Theoretical MW (kDa): 69.40000000000001

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Lyophilized

Conjugation: Biotin

Preparation Method: Mammalian cell (HEK293) expression system

Purity: > 95% by Tris-Bis PAGE
> 95% by HPLC

Endotoxin Level: < 0.1 EU per 1 ug as determined by the LAL method.

Activity: The affinity constant was 1.67 uM, determined by SPR assay.

Recommend Usage: Biological Activity

Tris-Bis PAGE

SEC-HPLC

SPR

The optimal working dilution should be determined by the end user.

Storage Buffer: Lyophilized from 0.22 um filtered solution in PBS, pH 7.4. (8% trehalose).

Storage Instruction: Store at -20°C for 12 months. After reconstitution, store at 4°C for 2-7 days, or store at -80°C for 3-6 months.

Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 213

Gene Symbol: ALB

Gene Alias: DKFZp779N1935, PRO0883, PRO0903, PRO1341

Gene Summary: Albumin is a soluble, monomeric protein which comprises about one-half of the blood serum protein. Albumin functions primarily as a carrier protein for steroids, fatty acids, and thyroid hormones and plays a role in stabilizing extracellular fluid volume. Albumin is a globular unglycosylated serum protein of molecular weight 65,000. Albumin is synthesized in the liver as preproalbumin which has an N-terminal peptide that is removed before the nascent protein is released from the rough endoplasmic reticulum. The product, proalbumin, is in turn cleaved in the Golgi vesicles to produce the secreted albumin. [provided by RefSeq]
