Datasheet

RELT (Human) Recombinant Protein

Catalog Number: P9155

Regulation Status: For research use only (RUO)

Product Description: Human RELT partial recombinant protein with hIgG-His tag in C-terminus expressed in Baculovirus cells.

Sequence:

STTLWQCPPGEEPDLDPGQGTLCRPCPPGTFSAAWG
SSPCQPHARCSLWRRLEAQVGMATRD TLCGDCWPG

LSLSPGKHHHHHH

Host: Viruses

Theoretical MW (kDa): 41.4

Protocols: See our web site at
<http://www.abnova.com/support/protocols.asp> or product
page for detailed protocols

Form: Liquid

Preparation Method: Baculovirus expression system

Purification: chromatographic

Purity: > 90% as determined by SDS-PAGE.

Isotype: Sf9, Baculovirus cells.

Storage Buffer: Solution (0.5 mg/mL) containing 1X
PBS, pH 7.4, 10% glycerol.

Storage Instruction: Store at 4°C for 2-4 weeks and
should be stored at -20°C to -80°C. For long term
storage it is recommended to add a carrier protein (0.1%
HSA or BSA).

Avoid repeated freeze/thaw cycles.

Entrez GeneID: 84957

Gene Symbol: RELT

Gene Alias: FLJ14993, TNFRSF19L

Gene Summary: The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor is especially abundant in hematologic tissues. It has been shown to activate the NF-kappaB pathway and selectively bind TNF receptor-associated factor 1 (TRAF1). This receptor is capable of stimulating T-cell proliferation in the presence of CD3 signaling, which suggests its regulatory role in immune response. Two alternatively spliced transcript variants of this gene encoding the same protein have been reported. [provided by RefSeq]
