Entrez GeneID: 56729

Gene Symbol: RETN

Gene Alias: ADSF, FIZZ3, MGC126603, MGC126609, RETN1, RSTN, XCP1

Gene Summary: This gene belongs to the family defined by the mouse resistin-like genes. The characteristic feature of this family is the C-terminal stretch of 10 cys residues with identical spacing. The mouse homolog of this protein is secreted by adipocytes, and may be the hormone potentially linking obesity to type II diabetes. [provided by RefSeq]
