Datasheet

FAT1 polyclonal antibody

Catalog Number: PAB20092

Regulatory Status: For research use only (RUO)

Product Description: Rabbit polyclonal antibody raised against recombinant FAT1.

Immunogen: Recombinant protein corresponding to amino acids of human FAT1.

Sequence:

DGLGAKVSFHSRLRITATDGENFATPLYINITVAASHKLV
NLQCEETGVAKMLAEKLLQANKLHNQGEVEDIFFDSH
SVNAHIPQFRSTLPTGIQVKENQPVGSSVIFMNSTDLD
TGFGNKL VYAVSGGNEDSCFMIDMETGM

Host: Rabbit

Reactivity: Human

Applications: IHC-P

(See our web site product page for detailed applications information)

Protocols: See our web site at

<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Purification: Antigen affinity purification

Isotype: IgG

Recommend Usage: Immunohistochemistry

(1:50-1:200)

The optimal working dilution should be determined by the end user.

Storage Buffer: In PBS, pH 7.2 (40% glycerol, 0.02% sodium azide)

Storage Instruction: Store at 4°C. For long term storage store at -20°C.

Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 2195

Gene Symbol: FAT1

Gene Alias: CDHF7, FAT, ME5, hFat1

Gene Summary: This gene is an ortholog of the *Drosophila fat* gene, which encodes a tumor suppressor essential for controlling cell proliferation during *Drosophila* development. The gene product is a member of the cadherin superfamily, a group of integral membrane proteins characterized by the presence of cadherin-type repeats. In addition to containing 34 tandem cadherin-type repeats, the gene product has five epidermal growth factor (EGF)-like repeats and one laminin A-G domain. This gene is expressed at high levels in a number of fetal epithelia. Its product probably functions as an adhesion molecule and/or signaling receptor, and is likely to be important in developmental processes and cell communication. Transcript variants derived from alternative splicing and/or alternative promoter usage exist, but they have not been fully described. [provided by RefSeq]
