Small RNA Prestain Marker Plus

Catalog Number: R0018

Regulatory Status: For research use only (RUO)

Product Description: The Small RNA Prestain Marker Plus consists of six prestained single-strand (blue and red) nucleic acids (apparent molecular weights are 20, 30, 40, 50, 75 and 100 bases) and it is visible during electrophoresis. The Small RNA Prestain Marker Plus is suitable for monitoring denaturing polyacrylamide gel electrophoresis and blotting onto membranes. The apparent sizes of bands in Small RNA Prestain Marker Plus are in excellent agreement with sizes of non-stained RNAs, 20, 30, 40, 50, 75 and 100 bases in length (about 95% accuracy). The Small RNA Prestain Marker Plus is supplied in a ready-to-use mixture and doesn't require heating or addition of a denaturing agent before use.

Applications: Electrophoresis

(See our web site product page for detailed applications information)

Protocols: See our web site at

<http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Recommend Usage: Recommended loading volumes:

Comb (Load volume)

4-10 mm (5-10 uL)

>10 mm (>10 uL)

Storage Buffer: In 2 mM Tris-HCl, pH 8.0 (8 mM EDTA, 78% formamide).

Storage Instruction: Store at -20°C.

Aliquot to avoid repeated freezing and thawing.
