Dog Liver Genomic DNA

Product Code: DG-314

Dog liver genomic DNA is pure high molecular weight intact DNA extracted from freshly harvested tissue of single healthy normal donor using classical liquid-liquid extraction method, dissolved in TE-Buffer, precisely quantified, and stored at -80°C. DNA sample is treated with DNase-free RNase to remove contaminant RNA.

Applications:

- PCR Amplification
- Southern blot analysis
- Genomic DNA methylation
- Single-nucleotide polymorphism (SNP) Analysis
- Profiling studies in gene expression
- DNA library construction

Quality Control:

- The integrity and purity of genomic DNA was tested by agarose gel electrophoresis and spectrophotometer
- Ratio of A260/280 is >1.8
- Free of RNA contamination
- Successful PCR amplification of Beta-Actin
- Successful digestion of DNA by EcoR1 and/or Hind III enzyme.

Packing/Shipping: Genomic DNA is provided in 1.5-ml tubes (0.1mg/tube) at a concentration of 0.5mg/ml or 1mg/ml in TE buffer
