C Elegans Genomic DNA

Cat.# GC-280

Size : 25µg

We offer a pure and intact high molecular size control genomic DNA. Genomic DNA is extracted from whole blood or tissues of single donor and treated with DNase-free RNase to remove contaminant RNA. Genomic DNA is provided in 1.5-ml tubes (0.1mg/tube) at a concentration of 0.5mg/ml or 1mg/ml in TE buffer.

Applications:

- **PCR Amplification**
- **Southern blot analysis**
- **Genomic DNA methylation**
- **Single-nucleotide polymorphism (SNP) Analysis**
- **Profiling studies in gene expression**
- **DNA library construction**

Quality Control:

- **The integrity and purity of genomic DNA was tested by agarose gel electrophoresis and spectrophotometer**
- **Ratio of A260/280 is >1.8**
- **Free of RNA contamination**
- **Successful PCR amplification of Beta-Actin**
- **Successful digestion of DNA by EcoR1 and/or Hind III enzyme.**
