RNAmate Certificate of Analysis

Product Name: RNAmate

Catalog No.: L1011100

Lot No.: A610070

Shipping Condition: Room temperature

Storage Condition: Room temperature

Shelf Life: One year from the date of receipt under proper storage condition

Hazard Warning: Irritant

Description

A common problem in currently used RNA isolation methods is the contamination of RNA with polysaccharides and proteoglycans, which will inhibit reverse transcription-polymerase chain reaction (RT-PCR). RNAmate is a ready-to-use reagent to purify RNA from this contamination, and it is confirmed by our intensive test that total RNA yield is not decreased. There is no similar product in current market yet.

Application

RNAmate can be used for isolating ultra pure total RNA from polysaccharide and proteoglycan rich tissues such as liver, aorta, etc. RNAmate can be used with any type of RNA isolation reagents such as TRIzol, RNeasy, etc.

Package Contents

1. RNAmate 100 ml
2. Certificate of Analysis
3. User Manual
