Mouse C57 paraventricular nucleous Coronal Paraffin Sections, Reg. 6

Cat. Code: MP-201-06-C57

Product Description

Mouse paraventricular nucleous Paraffin Coronal Sections, Reg. 6 are made of freshly harvested tissues, fixed in 10% neutral buffered formalin, and processed for paraffin embedding. Paraffin blocks are sectioned at a thickness of 5microns and mounted on positively charged slides (2-4 sections per slide depending on tissue size).

Quality Control: Tissue sections are H&E stained and examined by histologists with 28 years of experience to be sure of excellent morphology and high quality.

Applications: Paraffin tissue sections are prepared in RNase-, DNase-, and protease-free environment and are ideal for immunohistochemistry and *in situ* hybridization.

Packing/shipping: Paraffin sections are shipped in tightly closed slide boxes or slide mailers at room temperature and are good for one year if properly stored.

Intended use of the products: All products sold by AMSBIO are intended for research use only and must not be used for medical diagnostic or drug purposes. AMSBIO products may not resell, modified for resale or used to manufacture commercial products without written approval from AMSBIO.
Limited product warranty: AMSBIO has a total quality assurance policy. If any product does not meet the specification stated in the product data sheet will be replaced at no charge. This warranty limits AMSBIO liability to the replacement of the product only. No other warranties of any kind, express or implied, including without limitation, implied warranties of merchantability or fitness for a particular purpose, are provided by AMSBIO. AMSBIO shall not liable for any incidental, indirect, special or consequential damages, even if it is aware of the possibility of such damages.
