Data Sheet

Ready-to-use Mouse BALBC Small Intestine - Ileum Paraffin Tissue Sections

Catalog #: MP-309-BLC

Quantity: 10 slides

Storage Conditions: Store slides at room temperature in a dry place or at 4oC in a sealed bag containing desiccant Sections are good for 1 year of the date of purchase if stored properly.

Applications: Paraffin tissue sections are ideal for:

- Cellular localization of protein of interest in mouse tissues by immunohistochemistry.
- Cellular localization of mRNA of interest in mouse tissues by *in situ* hybridization or *in situ* PCR using both radioactive- and non-radioactive-labeled probes.

Description: Small intestine tissue is freshly harvested from BALB/C mouse, fixed in 10% buffered neutral formalin andprocessed for embedding in low temperature melting paraffin. Tissue blocks are cut at a thickness of 5 and mountedon positively charged slides. All tissue preparation steps from harvesting to embedding in paraffin are done in RNase-, DNase-, and protease-free conditions.

Shipping: Slides are shipped at room temperature in a slide mailer or slide box.

Prior to use: Remove paraffin by dipping slides in xylene or any substitutive agent (3 changes 5 minute each), rehydrate in serial ethanol dilutions, and finally wash with PBS. For in situ hybridization, make alcohol solutions and PBS in RNase-free water.
