Description of Target	Spa17 is a component of sperm acrosome; Spa17 binds A-kinase anchoring protein 3 (Akap3) and is thought to be involved in fertilization by binding to the zona pellucida of the oocyte?
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
