

# SZABO SCANDIC

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

| Description of Target                          | ZC3H14 belongs to the ZC3H14 family.It contains 2 C3H1-type zinc fingers. ZC3H14 binds the polyadenosine RNA oligonucleotides.                                                                                                                                                                                                                                                                                                       |
| Protein Interactions                           | DDIT3; UBC; RNF2; HECW2; LRRC42; UBAP2; UBE2S; THUMP3; ZNF207; SIRT7; SUMO2; SRRM1; EXOC7; KRT20;                                                                                                                                                                                                                                                                                                                                    |
| Reconstitution and Storage                     | All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding. |
