PRODUCTION

The antibody was isolated by affinity chromatography using antigen coupled to agarose beads. Immunoglobulin concentration was determined using Beer's Law where 1 mg/mL IgG

has an A280 of 1.4.

By immunoelectrophoresis and ELISA this antibody reacts specifically with bottlenose dolphin IgG and with light chains common to other bottlenose dolphin immunoglobulins.

No antibody was detected against non-immunoglobulin serum proteins.

This antibody may cross react with IgG from other species.

APPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined

experimentally by the investigator. Prepare working dilution immediately before use.
