# RanBP8 Antibody

Rabbit Polyclonal

Antigen Affinity Purified

Catalog No. A301-804A

Lot No. A301-804A-1

Protein ID NP\_006381.2

GeneID 10526

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                |

| BUFFER                | Tris-citrate/phosphate buffer, pH 7 to 8 containing 0.09% Sodium Azide                                                                                                                                                                                                                                                                                                                                                         |
| ISOTYPE               | IgG                                                                                                                                                                                                                                                                                                                                                                                                                            |
| ORIGIN                | USA                                                                                                                                                                                                                                                                                                                                                                                                                            |
| PRODUCTION PROCEDURES | <p>Antibody was affinity purified using an epitope specific to RanBP8 immobilized on solid support.</p> <p>The epitope recognized by A301-804A maps to a region between residue 987 and 1037 of human RAN binding protein 8 using the numbering given in entry NP_006381.2 (GeneID 10526).</p> <p>Immunoglobulin concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.</p> |
| APPLICATIONS          | <p>Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.</p> <p>Western Blot 1:2,000 – 1:10,000</p> <p>Immunoprecipitation Not recommended</p>                                                                                                                                                       |
| APPLICATION NOTES     | Western blot of lysates performed using standard western blot reagents and 4–8% SDS-PAGE.                                                                                                                                                                                                                                                                                                                                      |
