ORIGIN USA

PRODUCTION Cell culture supernatant was harvested from mammalian cells expressing recombinant

PROCEDURES rabbit monoclonal antibody.

The epitope recognized by A700-000 maps to a region between residues 125 and 175 of

human ortholog of mouse double minute 4 using the numbering given in entry

NP_002384.2 (GeneID 4194).

APPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined

experimentally by the investigator. Prepare working dilution immediately before use.

APPLICATION NOTES All western blot analysis is performed using 5% Milk-TBST for blocking and as antibody diluent.

Primary antibody is incubated overnight.

Western blots of cell lysates are performed using Goat anti-Rabbit IgG Heavy and Light Chain

Antibody (Cat. No. A120-101P).

Western blots of immunoprecipitates are performed using Goat anti-Rabbit Light Chain HRP Conjugate (Cat. No. A120-113P) with 5% Normal Pig Serum (Cat. No. S100-020) added to the

blocking buffer.

A700-000CF is the carrier-free formulation of A700-000. This product is optimized for

conjugation with enzymes, fluorochromes, biotin, radioisotopes, oligonucleotides,

microspheres, and other reagents. The optimal experimental concentration of the antibody

post-conjugation must be determined by the investigator.

This document certifies that this product has met all of the quality control standards defined by Bethyl Laboratories, Inc.
