## Purified Rabbit IgG

Catalog No. P120-301 Lot No. P120-301-12 BETHYL

SPECIES REACTIVITY Rabbit

AMOUNT 20 ml at 5 mg/ml

STORAGE/SHELF LIFE 2 - 8° C / 2 years from date of receipt

PHYSICAL STATE Liquid

**BUFFER** Phosphate Buffered Saline (PBS) containing 0.09% Sodium Azide

**ORIGIN** USA

PRODUCTION PROCEDURES

Purified normal rabbit IgG is isolated using fractionation and DEAE chromatography.

Protein concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4

equals 1.0 mg of IgG.

By immunoelectrophoresis the IgG was shown to 1) react with antiserum specific for rabbit IgG, 2) not react with antiserum specific for IgA or IgM, and 3) produce a single precipitin arc with

antiserum against rabbit serum identical to that produced with anti-IgG antisera.

**APPLICATIONS** Centrifuge tube to remove product from lid. Optimal working dilutions should be determined

experimentally by the investigator. Prepare working dilution immediately before use.

**APPLICATION NOTES** Used as a positive control in immunoassays.
