

# SZABO SCANDIC

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

Weitere Information auf den folgenden Seiten!  
See the following pages for more information!

### Lieferung & Zahlungsart

siehe unsere [Liefer- und Versandbedingungen](#)

### Zuschläge

- Mindermengenzuschlag
- Trockeneiszuschlag
- Gefahrgutzuschlag
- Expressversand

### SZABO-SCANDIC HandelsgmbH

Quellenstraße 110, A-1100 Wien

## Product Information

|                           |                                                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>Construct:</b>         | TPBG (32-355-Avi-His)-(Biotin)                                                                            |
| <b>Label:</b>             | This protein is enzymatically biotinylated using Avi-Tag™ technology. Biotinylation confirmed to be ≥90%. |
| <b>Concentration:</b>     | 1.58 mg/ml                                                                                                |
| <b>Species:</b>           | Human                                                                                                     |
| <b>Formulated In:</b>     | 8 mM phosphate, pH 7.4, 110 mM NaCl, 2.2 mM KCl, and 20% glycerol                                         |
| <b>Expression System:</b> | HEK293                                                                                                    |
| <b>Format:</b>            | Aqueous buffer solution.                                                                                  |
| <b>Stability:</b>         | At least 6 months at -80°C. Avoid freeze/thaw cycles.                                                     |
| <b>Storage:</b>           | -80°C                                                                                                     |
| <b>Genbank Accession:</b> | NM_006670.5                                                                                               |
| <b>MW:</b>                | 39 kDa + glycans                                                                                          |
| <b>Glycosylation:</b>     | This protein runs at a higher MW by SDS-PAGE due to glycosylation.                                        |
| <b>Purity:</b>            | ≥90%                                                                                                      |

## Quality Control Data

### 4-20% SDS-PAGE Coomassie Staining

### Biotin-Avidin Pulldown
